Style Number: 8012
Service: Pump Packing
Product Type : Braided Packing

Description:

Twisted and formed from anti-friction lead alloy, Style 8012 is impregnated with our proprietary low friction lubricant for low shaft wear and increased heat dissipation. Style 8012 packing is soft but dense, making it an excellent choice for end rings or anti-extrusion rings. This packing is ideally suited for most high pressure applications including boiler feed, reciprocating, or rotating pump service.

Construction:	Twisted & Formed
Temperature Rating:	450° F / 232°C
pH Rating:	4 – 10
Shaft Speed Rating:	3600 FPM / 18 MPS
Pressure Rating:	1000 PSI / 68 BAR
